

Admin Panel Guide

www.enfantorganic.com/django-admin/

Dashboard Setup

- Products:** Add, edit, manage stock & prices.
- Categories:** Group items (e.g., Baby Lotion).
- Orders:** Track and update order status.
- Coupons:** Create discount codes.

Managing Products

1. Add & Basic Info

Name, Short/Long description, Category, Publish toggle.

2. Images & Gallery

Main image + hover image. Add extra photos in Gallery table.

3. Pricing by Region

Set Price & Compare Price for OMR, AED, and SAR.

Product Variants (Sizes, Packs)

For products with multiple options (e.g., 200g vs 400g):

- Open the **Variants & Options** section.
- Paste the JSON template.
- Update prices, stock, and names for each variation.
- To mark out of stock, set `"is_available": false`.

```
"id": "v1",
"title_en": "200 Gram",
"pricing": {
  "amount": 2.400,
  "currency_code": "OMR"
},
"is_available": true
```

Orders & Fulfillment

- View:** Check order number, customer details, and items.

Coupons & Discounts

Create new code (e.g., SUMMER20):

- Type (% or \$)
- Discount Value

 **Update Status:** Pending → Confirmed → Shipped → Delivered.

 **Filter:** By region, payment method, date.

- Min Order Amount
- Valid Dates
- Usage Limits
- Active Toggle

Important Rules & Troubleshooting

 **Never delete** categories with active products.

 **Do not change** a product's Slug after publishing.

 **Always Save!** Changes are not auto-saved.

 **Not showing?** Check "Is Published", category, and price.

 **Variant issues?** Check JSON formatting (commas, quotes).
